

HOW TO DO MORE WITH WHAT YOU HAVE

It is possible to do more with what you have, which is important in today's economy more than ever before. This classroom-style workshop will shift the way you "see" your work and open your mind to an alternative work paradigm. Attendees leave this interactive course inspired with foundational principles in-hand to begin implementing Lean process improvement in their workplace.

By understanding the principles of Lean, business owners and managers can begin to **lead change** in their organization, **get employees engaged** in solving problems, and begin to **integrate continuous improvement thinking** into their corporate culture. All of this will result in improved productivity and a happier customer.

In this interactive workshop, you will familiarize yourself with the principles of Lean by operating workstations along an assembly line in a fictional aircraft plant. Through the visual, hands-on simulation, you will:

- ✓ See how thinking about your work differently can **dramatically improve productivity**
- ✓ Understand the foundation, principles, and goals of a Lean organization
- ✓ Gain a 5S understanding of Lean tools including kaizen, continuous improvement, recognizing waste, pull and one-piece flow, and much more.

No matter what your organization does, Lean will help you do it better. Lean methodology is being applied in a broad range of enterprises including manufacturing, processing, construction, health care, engineering, banking, and government services.

PRICE

Half-day Lean Intro: \$149 per person

Full-day Lean 101: \$199 per person.

6 (min) to 12 (max) Participants per Workshop.

Volume discounts available to employers.
