

WHAT DOES SUCCESS LOOK LIKE?

This session is intended for the start of every project or training program. Participants are asked a series of questions and responses are provided back to the facilitator with sticky notes. The facilitated discussion helps determine “what success looks like” for the collective group and sets up direction for this group to follow using schedule and deliverables determined in the session.

Specific, Measurable, Attainable, Relevant, and Timebound. By collaborating and setting shared objectives or goals with your team, business owners and managers can begin to **lead change** in their organization, and **get employees engaged** in a common direction.

In this interactive workshop, you will learn how mapping out what success looks like using a series of questions at the beginning of a project or task can help create a path to success. Through the visual, interactive session, you will:

- ✓ Learn **what does success look like** for the group
- ✓ See how a facilitated Lean session is organized and engaged with all participants
- ✓ Begin to learn the benefit of **pull-planning** and quick stand-up meetings
- ✓ Use sticky-notes in a quick and effective manner

No matter what your organization does, Lean will help you do it better. Lean methodology is being applied in a broad range of enterprises including manufacturing, processing, construction, healthcare, engineering, banking, and government services.

PRICE

3 hour Facilitated Session: \$500

Session should include relevant stakeholders, and Leaders who will influence and drive change.

FACILITATOR

Shafraaz Kaba is an architect who thrives on designing architecture that is ecologically aware. His work at Manasc Isaac Architects focuses on the development of buildings that strive for net-zero energy and carbon-emission reducing goals.

Over the last 20 years, he has made significant contributions to the design and cultural landscape of Edmonton, through founding Media Architecture Design Edmonton (MADE). Shafraaz has been involved with the Canadian Green Building Council Alberta Leadership Board and the Lean Construction Institute of Canada.
